"Man of Destiny" and "Grass Widow."
Please tell me when and why the late President Cleveland came to be called the "Man of Destiny"? Also inform me of the origin of the phrase: What, also, is the meaning of the term, "grass widow"?
The phrase, "Man of Destiny," was applied to Napoleon Bonaparte, who believed himself a chosen instrument of destiny, and thought that all his actions were guided by fate. On Grover Cleveland the term was also bestowed, at a public banquet in Buffalo in the spring of 1833, in allusion to the rapid rise of Mr. Cleveland in the political world and to the high position it was believed he would one day attain, believed he would one day attain, "Grass widow" is a corrupt use of the phrase "grace widow"—that is, a widow by grace or courtesy, not in fact. In this country the phrase means either a divorced wife or one separated from her husband.

HISTOY OF CONSTITUTE OF CONTINUES OF

Lese Majeste.

I have, in my reading, come across repeatedly the term "lese majeste."

Kindly state what the phrase means.

Lese majeste (leez-maj-es-ti) signifies high treason, and, in law, any by Seneca.

Queintion.

Whence the quotation, "The mind is the proper judge of the man"?

It is from "Happy Life," chapter I, by Seneca.

crime committed against the sovereign power in a State. Our English word lesion—a hurt, wound, or injury—come from the same Latin source as "lese," sometimes written "leze." Lese majeste denotes, therefore, a hurt or wrong done the King, or an act of reboilion, usurpation, or defamation directed against sovereignty. In Romaniaw the term signifies an offense against the majesty of the Roman people. Stubbs, in his "Constitutional History of England" says that "the contriving or counseling or consenting to the King's death, or sedition against the King, are included in the crime of less majeste." In Germany, under the present autocratic regime, prossections have been frequent for this offense. crime committed against the sovereign

POSITION OF FRANCE ON NOBILITY TITLES

BY LA MARQUISE DE FONTENOY.

RANCE'S Keeper of the Great Seal,
and Minister of Justice, speaking in the name of the French
government, has just, in response
to an inquiry on the part of Charles
Leboucq, deputy of the Seine, made
clear the position of the present
French republic with regard to titles
of nobility, about which there appears
of nobility, about which there appears

The government of the republic has of course never bestowed any titles of nobility, and during its entire existence of forty years, has only consented, with much reluctance, to register half-a-dozen conferred by Pius IX., between 1876 and 1878. All the other titles conferred upon French citizens by the Vatican, by the King of Italy, by the King of Spain, by the King of Portugal and by petty German rulers, have received no sanction, and are invalid in the eyes of French law. It is only titles bestowed by the Bourbon rulers of France prior and subsequent to the great Revolution of 1793, and those created by the first and third Napoleon, as well as those of foreign origin, which have been officially recognized, besides the half-adozen Papal titles granted by Pius IX., which on due registration by the Keeyer of the Great Seal, have legal

The Keeper of the Great Seal in his reply in the Chamber of Deputies to the inquiry of Representative Leboucq, further pledged himself to apply from henceforth, with much more severity than heretofore, the more severity than heretofore, the laws contained in Article 259 of the Penal Code, punishing the use of unauthorized titles. In conclusion, it must be thoroughly understood, first of all, that the laws of the days of the Teror, abolishing nobiliary titles, were repealed during the reign of the first Napoleon, and that there has been no abolition since then of French titles of nobility; secondly, that their descent is strictly restricted to the male line direct, that they cannot be inherited through the distaff side of the house.

only to those who regard the nose as an organ of speech, we would asy that we have not been able to find it in the Bible, as we made sure we could; but, it certainly is as old as Milton, who was something of a Fsalm singer even if he was not born in North Carolina and never lived in North Carolina and never lived in New England.

Jules S. Bache, head of an important banking firm, in New York, has returned home from a visit to France and Egypt, in both of which countries they were still talking about the Colonel and his pleturesque trip. "His efforts," says Mr. Bache, "have led foreigners to fear that any possibility of his return to political power in this country would be detrimental to business conditions." We have not the least doubt of it. We do not know of any worse misfortune that could befall the United States than Mr. Roossevit's return to power, and his directing the affairs of the country, as he appears to be determined to do, would be hardly less harmful.

Eight years ago Waterbury, Confined to do, would be hardly less harmful.

Eight years ago Waterbury, Confined to do, would be hardly less harmful, was largely destroyed by a fre. Some of the faint-hearted were disposed to give up the fight; but other braver men went to work and the recent United States Census shows with what results. An increase of Go.5 per cent, in the population of the town in ten years is a record of which any community might well be proud. We are not surprised, as there is no town in New England where there is more to attract the industrious and no place anywhere in which the average intelligence of the community is higher and the noncle of a hatter gert. In the population of the community might well be proud. We are not surprised, as there is no town in New England where there is more to attract the industrious and no place anywhere in which the average intelligence of the community is higher and the noncle of a hatter gert. In the population of the community might well be proud. We are not surprised, as there is no town in Ne

spirited troops, posted up on the walls a proclamation that he would only return dead or victorious. The fates, however, were against him. Easer for death on the battlefield, realizing death on the battlefield, realizing moreover, that if captured by the enemy he would be instantly shot as a man who had broken his parole, he nevertheless rushed single-handed at a band of German soldlers, from the midst of which his troops rescued him and carried him off the neid, kicking and struggling. The next day he went into the voluntary seclusion from which he never emerged, and became so dead, not only to the world in general, but even to his relatives and friends, that no one knew, until the official announcement of his demise the tother day, that he had survived for so many years.

Leboucq, deputy of the Seine, made clear the position of the present French republic with regard to tities of nobility, about which there appears to be so much misapprehension.

It is a mistake to believe that these titles have been abolished. On the contrary, those which are authentic that is to say, which have descended in the male line direct, as provided by French law, are not only recegnized by the republic. But they have to be registered by the revival of an oil ditie which has been in abeyance. The Keeper of the Great Seal and the Department of Justice, either on the succession of a lawful heir or on the revival of an oil ditie which has been in abeyance. The Keeper of the Great Seal and the event of full and convincing documentary proof being furnished of the existence of the title, by means of the original letters patent creating it, or else, when these patents have been lost, by other official documentary evidence, furnishing testimon that they have existed. The Department of Justice is extremely particular about these registrations, and there is no such favoritism as existed in the reign of University, and during its entire existence of forty years, has only consented, with much reluctance, to registrations, and there is no such favoritism as existed in the registrations, and there is no such favoritism as existed in the registrations, and there is no such favoritism as existed in the regist of nobility, and during its entire existence of forty years, has only consented, with much reluctance, to registrations, and there is no such favoritism as existed in the registrations as existed in the regist of nobility, and during its entire existence of forty years, has only consented with the British Embassy at the particular about these registrations, and there is no such favoritism as existed in the regist of nobility, and during its entire existence of forty years, has only consented with the British Embassy at the present holder of the old Dering haronetcy to the death of an elder form of the present hol

Crimean war, he succumbed to drink, an outcast from society, in South America, and it was there that Edward Dering met his widow and married her, making his home with her in Lima until her death.
